Terrastone er en naturlig, dekorativ puss laget på marmor og kalk- en puss som med sitt naturlige og rustikke preg gir et spennende uttrykk på vegger i både private og offentlige miljøer.

Pussen er egnet fremst for vegger i tørre rom, peiser og piper, men kan også legges på benker, bar- eller resepsjonsdisker og andre møbler.

For Terrastone finnes 91 standardfarger som blandes av naturlige fargepigmenter, og med eller uten tilslag av alabaster som gir karakteristiske glimmer-effekten. Overflatene pusses og komprimeres til ønsket effekt og overflatene kan til slutt behandles med voks, olje eller impregnering for et matt eller polert uttrykk.
